

SVEA KANAL – two-way channel for business support between Scandinavia and west Balkan regions. Our job is supported on two pillars.

Business consultancy – where we offer support when establishing business, B2B, market activity and the other ways for support on Scandinavian as well on Balkan Market.

Agency – representing Scandinavian innovative technique in the energy efficiency sector and environment protection in region of West Balkan.

Our ambition is to be natural channel for small and mid size companies which are doing business in Scandinavia and West Balkan – and who wants access to other market. Svea Kanal channel business activity between these regions.

SWEDEN RANKED 2nd WORLD WIDE IN SUSTAINABLE TECHNOLOGIES

The report is completed by Yale and Colombia Universities. This year's environmental report, which establishes the EPI-index, ranks the Nordic countries in top. There are 20 parameters taken in consideration, such as green house gases, water resources, sustainable energy, biological diversity etc. Out of 149 countries Sweden is placed second after Switzerland and followed by Norway and Finland.

AEROVIT - NEW TECHNOLOGY FOR SOOTCLEANING

Cooperation with Danish company OKR Cleaning was established in late October. A seminar to introduce the technology was held in Zagreb, were approximately 20 companies were represented. Shortly after the seminar, Danish representatives made a follow up trip in the region. Both boiler producers and end customers showed a great interest. Jadroplov, the Split based Ship owner made the first order by the end of December. Installation is to take place on the vessel Split in Australia during January/February. OKR and Svea Kanal are now looking forward to receive first land installation.

CROATIA FORMED COMMITTEE FOR ENERGY AND RENEWABLE ENERGY SOURCES

In March 2007, Croatian Government has decided to stimulate production of electric energy from renewable energy sources. New Government on one of his first sessions in January has formed Committee for energy and renewable energy sources with aim to monitor prices and stimulate implementation and use of renewable sources. Head of Committee is Mr. Damir Polančec, Minister of economy

WORLD BIOENERGY DAYS 27-29TH OF MAY

Swedish town of Jönköping is hosting this year's number one event for bio energy solutions and systems. If you are interested in participating you are welcome to join Svea Kanal. Our aim is to form a delegation, consisting of political decision makers and technical personnel from the energy sector, and travel together with interested persons from the region. Svea Kanal is looking forward to your participation together with us on World bio energy days in Jönköping.

MORE INOVATIVE TECHNIQUES TO AWAIT

After almost 3 years presence in the western Balkan, Svea Kanal is now focusing on extending the Scandinavian network. The purpose is to continue to deliver/supply/introduce innovative technique for the energy and marine sector. Svea Kanal urges you and your organization to use our network and knowledge to keep your company competitive on the market. Use our channel to Scandinavia!

SUCSESSFULL INFRAFONE INSTALLATION AT M/S ZRINSKI

Zadar based company Tankerska Plovidba installed one Infracone soot cleaner on their vessel Zrinski in October 2007. After more than three months of installation the technical inspector Mr. Branimir Maricic is expressing his satisfaction with the result of the installation. Zrinski has not stopped its boiler operations for soot cleaning since the installation was made in October 2007. Upon request from Tankerska Plovidba, Svea Kanal provided a repeat quotation for the sister ship Frankopan.
